

Magnum Pro[®]

Calibration Pumps

NEW
MVP - 600

(Pat. Pending)

East Hills Instruments is Rhino Tough!

Unique Features

Contoured handles with rubber cushion.

Protective cage surrounding the vent knob.

The indestructible Schrader Valve is used as the vent valve instead of the commonly used Needle Valve. The Schrader Valve is "mash proof"!

A patented synthetic, non-oil based lubricant is used on all moving parts to prevent premature wear.

Specifications

Model # MVP-600

Range: Vacuum to 600psi

Weight: 2 lbs

Length: 9"

The Magnum Pro Calibration Pumps were introduced in 2003 and have rapidly become the pump of choice. It has earned the reputation throughout the industry as being one of the toughest and most reliable pumps on the market. That is why it is the only pump on the market to offer both a 30 day risk free trial as well as a 2 year "quibble free" warantee.

The "quibble free" warantee guarantees the Magnum Pro Calibration Pumps will perform as purchased for a period of 2 years from date of purchase without cost. This also includes dropping them on a concrete floor!

For additional information or to inquire about the 30 day risk free trial contact:
