## Easidew Transmitters

### The Universal Moisture Transmitter

The Easidew transmitter has a wide measurement range from  $-110$  to  $+20^{\circ}\text{Cdp}$  and one stocked product can be used across all class 1 to class 6 industrial dryer applications.

The Easidew family of industrial transmitters incorporates the latest Michell advanced ceramic technology providing stable, reliable and repeatable moisture measurements for all dew point applications.

### Ease of Installation

Flexible product design ensures the unit can be quickly and economically installed.

- Mini DIN 43650 form C or M12 5 pin electrical connectors
- 5/8" UNF, 3/4" UNF, G1/2" BSP process connections
- 316 stainless steel transmitter sample blocks
- On site configuration and diagnostic communication tool

### Service Exchange/Recalibration Program

Michell offers 2 services for customers who want minimum downtime and sensor traceability, while maintaining the reliability of their system:

- **Sensor Exchange** - Customers place an order for a guaranteed, reconditioned sensor. When this arrives, they exchange it for the installed sensor which is returned to Michell, resulting in zero process downtime.
- **Recalibration** - Customers return their installed sensor to Michell, where they are inspected, checked and recalibrated before being returned. This provides on-going sensor traceability for the process.

### Global Certifications

The Easidew series has a broad range of certifications to ensure a single stocked unit can be used in any global application.

- Easidew I.S. - ATEX & IECEx
- Easidew I.S. - cCSAus (US and Canada) & FM
- Easidew I.S. - EX-TC TR
- Easidew - UL approval
- All Easidews - Canadian pressure vessel approved (CRN)

Michell has a large team of experienced field and factory based application engineers who are available to assist with any dew point sensor application.

### Safety and Integrity

The mechanical design considers the health and safety quality requirements of the end user, offering an ultra-high process pressure barrier, along with meticulous levels of product traceability and quality.

- High performance 450 bar process media barrier
- Optional gas wetted parts BS EN 10204 3.1 material certified
- Optional cleaning for enriched oxygen service
- 13 point calibration certificate

### Measurement Performance

The transmitter uses Michell's market leading ceramic measurement technology coupled with the latest generation, sophisticated microcontroller electronics to provide accurate and stable measurement across the transmitters product life.

- Accuracy  $\pm 2^{\circ}\text{Cdp}$
- Fast response to moisture changes

### Flexibility of Ownership

The Easidew transmitter has a RS485 communication system, which gives customers the opportunity to re-range and re-scale with a communication kit for a wide variety of moisture measurements.

- Re-ranging 4–20 mA within the  $-110$  to  $+20^{\circ}\text{Cdp}$  range
- Moisture scaling — dew point,  $\text{ppm}_v$

### Speed of Supply

The transmitter is manufactured within Michell's world-leading high-volume moisture transmitter manufacturing centre in the United Kingdom, which ensures reliability and repeatability of delivery and field supported by a network of Michell's global service centres.

- Calibration manufacturing system is traceable to globally recognised NPL and NIST ISO 17025 standards

### Installation Accessories

Transmitters are available with a range of practical accessories.

- 5/8" UNF, 3/4" UNF, G1/2" BSP Sample blocks
- Compact simple sample systems
